German: B2 Certified

PROFESSIONAL PROFILE

Senior FullStack Software Engineer and Technical SEO Consultant with 15+ years of experience building custom web solutions, optimizing high-volume e-commerce platforms, and automating complex data flows. Specialized in Web Performance Optimization (WPO), advanced Core Web Vitals audits, crawl budget optimization, indexability troubleshooting, and web infrastructure. I blend solid backend mastery (PHP/Laravel/WordPress) with a commercial and conversion-driven approach to boost organic traffic and conversions.

SELECTED PROJECTS

WPO & Technical SEO Optimization

Performance auditing and refactoring on production websites, achieving perfect 100/100 Google Lighthouse scores. Implementation of structured schema data (Schema.org), indexing controls, and indexation budget management.

Custom Web & WooCommerce Solutions

Custom theme and plugin development for WordPress/WooCommerce, high-performance Laravel applications, and secure integrations with payment systems (Stripe) and corporate ERP/REST APIs.

Automation & Web Scrapping Robots

Custom Python scripts, scraper spiders, and analytics tools designed to extract indexing and SEO metrics, generating dashboards focused on conversion rates.

PROFESSIONAL EXPERIENCE

Walkiria Apps

2015 – Pres.

FullStack Developer & SEO Technical Consultant

Independent software engineering and WPO/SEO technical consulting for clients across multiple commercial sectors.

- **GdBodas.net**: Full-stack design and technical implementation of the musical events portal.
- **Artroscopia Albacete**: Medical portal optimized for fast loading, technical local SEO, and maximum discoverability.
- **Candelas y Felipa**: E-commerce storefront built on Magento with highly customized plugins and backend integrations.
- Auditing, maintaining server setups, and creating custom WordPress plugins.

Salumedia

2018 – 2020

Senior Software Development Engineer

Full-stack engineering: designed REST APIs using PHP (Slim framework), dynamic frontend development with ReactJS, AWS deployment, and real-time MQTT message broker management for IoT health services.

Ontic Soluciones

2012 – 2015

Android, PHP & Magento Developer

Web developer on high-traffic Magento stores, custom PHP modules, REST APIs, and native/hybrid mobile application developer.

appslab

2011 – 2012

Android & Web Developer / Sysadmin

Frontend development and web server administration utilizing cPanel and Apache.

Ontic Soluciones

2010 (4 mos.)

Programmer

Backend development and data processing optimization algorithms.

TEACHING & EDUCATION

University of Castilla-La Mancha (UCLM)
